

**DIGITAL PROJECTOR BULBS**

Until recently there weren't too many options when it came to re-lamping digital projectors. Really, your only option was to pay a premium for OEM lamps.

Specialty Bulb can now supply you with re-lamped high-end digital and data video projection lamps. We pride ourselves on being able to offer you a lower cost lamp and an extremely fast turn-around.

All re-lamping is done in house, meets or exceeds factory specifications, and carries a 100% guarantee if the bulb is used less than 100 hours. Any lamp used over a 100 hours carries a pro-rated warranty.

Re-lamping your projectors this way can save you a significant amount of money, 15% to 20%, and sometimes even more.

Not only is it a great deal, but we can assure you that the quality of these projector replacement lamps are equivalent to, or better than the comparable OEM lamp.

**Digital Projectors We Cover**

We provide you with high quality replacement lamps for all major brands of Xenon projector modules such as NEC, Christie, Barco, JVC, and Digital Projection. As with all the specialty lighting products we supply, we guarantee superb customer service too.

**We're the Equipment Lighting Specialists**

Specialty Bulb Products Inc. has been a leader in the industry of replacement and specialty bulbs for 25 years. We are all about lighting. We supply the entertainment, audio visual, ultra violet, medical, scientific, marine, aviation, and institutional lighting industries.

We carry all of the major brands and many of the hard to find lamps too. We stock the broadest range of projector lamps in Canada.
